1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Pediatric Rehabilitation Medicine**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48 Pediatric rehabilitation medicine utilizes an interdisciplinary approach to address
49 the prevention, diagnosis, treatment, and management of congenital and
50 childhood-onset physical disabilities ~~impairments~~, including related or secondary
51 medical, physical, ~~functional~~, cognitive, psychosocial, educational, and
52 vocational, and avocational limitations or conditions, with an understanding of the
53 life course of the disability.
54

55
56 **Int.C. Length of Educational Program**

57
58 The educational program in pediatric rehabilitation medicine must be 24 months
59 in length. (Core)*
60

61 **I. Oversight**

62
63 **I.A. Sponsoring Institution**

64
65 *The Sponsoring Institution is the organization or entity that assumes the*
66 *ultimate financial and academic responsibility for a program of graduate*
67 *medical education consistent with the ACGME Institutional Requirements.*
68

69 *When the Sponsoring Institution is not a rotation site for the program, the*
70 *most commonly utilized site of clinical activity for the program is the*
71 *primary clinical site.*
72

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

73
74 **I.A.1. The program must be sponsored by one ACGME-accredited**
75 **Sponsoring Institution. (Core)***
76

77 **I.B. Participating Sites**

78
79 *A participating site is an organization providing educational experiences or*
80 *educational assignments/rotations for fellows.*
81

82 **I.B.1. The program, with approval of its Sponsoring Institution, must**
83 **designate a primary clinical site. (Core)**

84
85 **I.B.1.a) The Sponsoring Institution should sponsor an ACGME-accredited**
86 **residency program in physical medicine and rehabilitation. (Core)**
87

88 **I.B.1.b) There ~~must~~ should be close collaboration between the core**
89 **associated physical medicine and rehabilitation residency program**

and the pediatric rehabilitation medicine fellowship. ^(Core)

I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. ^(Core)

I.B.2.a) The PLA must:

I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)

I.B.2.a).(2) be approved by the designated institutional official (DIO). ^(Core)

I.B.3. The program must monitor the clinical learning and working environment at all participating sites. ^(Core)

I.B.3.a) At each participating site there must be one faculty member, designated by the program director, who is accountable for fellow education for that site, in collaboration with the program director. ^(Core)

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME's Accreditation Data System (ADS). ^(Core)

I.B.5. All participating sites providing clinical experiences should be geographically proximate to ~~in the same geographic location as the~~

120 primary clinical site, limited to a travel time of no more than one hour each
121 way for rotations requiring daily attendance, unless appropriate overnight
122 accommodations are provided by the program or institution. ^(Detail)
123

124 **I.C. The program, in partnership with its Sponsoring Institution, must engage in**
125 **practices that focus on mission-driven, ongoing, systematic recruitment**
126 **and retention of a diverse and inclusive workforce of residents (if present),**
127 **fellows, faculty members, senior administrative staff members, and other**
128 **relevant members of its academic community.** ^(Core)
129

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

130
131 **I.D. Resources**

132
133 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
134 **ensure the availability of adequate resources for fellow education.**
135 ^(Core)
136

137 I.D.1.a) The program must have access to a ~~resources service-delivery~~
138 ~~system~~ dedicated to the care of patients ~~persons~~ with pediatric
139 ~~rehabilitative~~ rehabilitation medicine disorders, including: ^(Core)
140

141 I.D.1.b) ~~Resources must include:~~

142
143 I.D.1.b).(1) inpatient pediatric rehabilitation beds; ^(Core)
144

145 I.D.1.b).(2) a designated outpatient clinic or examination area for
146 patients with pediatric ~~rehabilitative~~ rehabilitation medicine
147 disorders; ^(Core) ^(Detail)
148

149 I.D.1.b).(3) transitional services for home care, community entry, and
150 schooling; ^(Core) ^(Detail)
151

152 I.D.1.b).(4) equipment, electrodiagnostic devices, imaging radiology
153 services, laboratory services, and clinical rehabilitation
154 facilities necessary to provide appropriate care ~~to~~ for
155 patients with pediatric ~~rehabilitative~~ rehabilitation medicine
156 disorders; ^(Core) ^(Detail)
157

158 I.D.1.b).(5) space and technology ~~facilities~~ for teaching; ^(Core) ^(Detail)
159

160 I.D.1.b).(6) a medical records system that allows for efficient case
161 retrieval; and, ^(Core)
162

163 I.D.1.b).(7) specialty and subspecialty pediatric consulting services
164 essential to the care of patients with pediatric ~~rehabilitative~~

165 rehabilitation medicine disorders, including. (Core) (Detail)

166
167 I.D.1.b).(7).(a) This should include anesthesiology, diagnostic
168 radiology, emergency medicine, general surgery,
169 medical genetics, neurological surgery, neurology,
170 ophthalmology, orthopaedic surgery,
171 otolaryngology, pathology, pediatrics, pediatric
172 surgery, plastic surgery, psychiatry/psychology,
173 pulmonary medicine, and urology. (Detail)

174
175 I.D.1.c) ~~Fellows must be provided with prompt, reliable systems for~~
176 ~~communication and interactions with supervisory physician faculty~~
177 ~~members.~~ (Core)

178
179 I.D.2. The program, in partnership with its Sponsoring Institution, must
180 ensure healthy and safe learning and working environments that
181 promote fellow well-being and provide for: (Core)

182
183 I.D.2.a) access to food while on duty; (Core)

184
185 I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available
186 and accessible for fellows with proximity appropriate for safe
187 patient care; (Core)

188
Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

189
190 I.D.2.c) clean and private facilities for lactation that have refrigeration
191 capabilities, with proximity appropriate for safe patient care;
192 (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

194
195 I.D.2.d) security and safety measures appropriate to the participating
196 site; and, (Core)

197
198 I.D.2.e) accommodations for fellows with disabilities consistent with
199 the Sponsoring Institution's policy. (Core)

200
201 **I.D.3.** **Fellows must have ready access to subspecialty-specific and other**
202 **appropriate reference material in print or electronic format. This**
203 **must include access to electronic medical literature databases with**
204 **full text capabilities.** ^(Core)

205
206 **I.D.4.** **The program’s educational and clinical resources must be adequate**
207 **to support the number of fellows appointed to the program.** ^(Core)

208
209 I.D.4.a) The patient population must be of sufficient size and diversity of
210 pediatric age groups to allow fellows to care for an adequate
211 number of patients, in both inpatient and outpatient settings, in all
212 pediatric rehabilitative diagnostic categories (as per Program
213 Requirements IV.B.1.b).(1).(b).(ii)(a)-IV.B.1.b).(1).(b).(ii)(j)). ^(Core)

214
215 I.D.4.a).(1) Fellows must see infants, toddlers, children, and
216 adolescents during their clinical experiences. ^(Core)

217
218 I.D.4.a).(2) For the common delineated pediatric rehabilitation
219 diagnostic categories, a fellow must provide care for no
220 fewer than five patients in inpatient or outpatients settings.
221 ^(Core)

222
223 **I.E.** ***A fellowship program usually occurs in the context of many learners and***
224 ***other care providers and limited clinical resources. It should be structured***
225 ***to optimize education for all learners present.***

226
227 **I.E.1.** **Fellows should contribute to the education of residents in core**
228 **programs, if present.** ^(Core)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows’ education is not compromised by the presence of other providers and learners, and that fellows’ education does not compromise core residents’ education.

230
231 **II. Personnel**

232
233 **II.A. Program Director**

234
235 **II.A.1.** **There must be one faculty member appointed as program director**
236 **with authority and accountability for the overall program, including**
237 **compliance with all applicable program requirements.** ^(Core)

238
239 **II.A.1.a)** **The Sponsoring Institution’s Graduate Medical Education**
240 **Committee (GMEC) must approve a change in program**
241 **director.** ^(Core)

242

243 **II.A.1.b) Final approval of the program director resides with the**
244 **Review Committee.** (Core)
245

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

246
247 **II.A.2. The program director must be provided with support adequate for**
248 **administration of the program based upon its size and configuration.**
249 (Core)

250
251 **II.A.2.a)** ~~The program director must not be required to generate clinical or~~
252 ~~other income to provide this support. The support should be a~~
253 ~~minimum of 10 percent of the program director's annual salary,~~
254 ~~depending on the size of the program.~~ (Core)

255
256 **II.A.2.b)** Programs with one to two fellows must provide a minimum of 10
257 percent FTE protected administrative time for the program
258 director. (Core)

259
260 **II.A.2.b).(1)** Programs with more than two fellows must provide an
261 additional one percent protected administrative time for
262 each additional fellow. (Core)

263
264 **II.A.2.b).(2)** This support may be shared by a program director and one
265 or more associate directors. (Detail)

266
267 **II.A.3. Qualifications of the program director:**

268
269 **II.A.3.a) must include subspecialty expertise and qualifications**
270 **acceptable to the Review Committee; and,** (Core)

271
272 **II.A.3.a).(1)** The program director should have experience as a faculty
273 member in pediatric rehabilitation medicine for a minimum
274 of two years prior to appointment as program director. (Core)

275
276 **II.A.3.b) must include current certification in the subspecialty for**
277 **which they are the program director by the American Board**
278 **of Physical Medicine and Rehabilitation, or subspecialty**
279 **qualifications that are acceptable to the Review Committee.**
280 (Core)

281
282 [Note that while the Common Program Requirements deem
283 certification by a certifying board of the American Osteopathic
284 Association (AOA) acceptable, there is no AOA board that offers
285 certification in this subspecialty]
286

287 II.A.3.b).(1) Dual primary certifications through both the American
288 Board of Physical Medicine and Rehabilitation or the
289 American Osteopathic Board of Physical Medicine and
290 Rehabilitation and the American Board of Pediatrics or the
291 American Osteopathic Board of Pediatrics are considered
292 acceptable qualifications. ^(Detail)
293

294 **II.A.4. Program Director Responsibilities**

295 **The program director must have responsibility, authority, and**
296 **accountability for: administration and operations; teaching and**
297 **scholarly activity; fellow recruitment and selection, evaluation, and**
298 **promotion of fellows, and disciplinary action; supervision of fellows;**
299 **and fellow education in the context of patient care.** ^(Core)
300

301 **II.A.4.a) The program director must:**

302 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)
303
304
305

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

306 **II.A.4.a).(2) design and conduct the program in a fashion**
307 **consistent with the needs of the community, the**
308 **mission(s) of the Sponsoring Institution, and the**
309 **mission(s) of the program;** ^(Core)
310
311

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

312 **II.A.4.a).(3) administer and maintain a learning environment**
313 **conducive to educating the fellows in each of the**
314 **ACGME Competency domains;** ^(Core)
315
316

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

317

- 318 II.A.4.a).(4) develop and oversee a process to evaluate candidates
 319 prior to approval as program faculty members for
 320 participation in the fellowship program education and
 321 at least annually thereafter, as outlined in V.B.; (Core)
 322
- 323 II.A.4.a).(5) have the authority to approve program faculty
 324 members for participation in the fellowship program
 325 education at all sites; (Core)
 326
- 327 II.A.4.a).(6) have the authority to remove program faculty
 328 members from participation in the fellowship program
 329 education at all sites; (Core)
 330
- 331 II.A.4.a).(7) have the authority to remove fellows from supervising
 332 interactions and/or learning environments that do not
 333 meet the standards of the program; (Core)
 334

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 335
- 336 II.A.4.a).(8) submit accurate and complete information required
 337 and requested by the DIO, GMEC, and ACGME; (Core)
 338
- 339 II.A.4.a).(9) provide applicants who are offered an interview with
 340 information related to the applicant's eligibility for the
 341 relevant subspecialty board examination(s); (Core)
 342
- 343 II.A.4.a).(10) provide a learning and working environment in which
 344 fellows have the opportunity to raise concerns and
 345 provide feedback in a confidential manner as
 346 appropriate, without fear of intimidation or retaliation;
 347 (Core)
 348
- 349 II.A.4.a).(11) ensure the program's compliance with the Sponsoring
 350 Institution's policies and procedures related to
 351 grievances and due process; (Core)
 352
- 353 II.A.4.a).(12) ensure the program's compliance with the Sponsoring
 354 Institution's policies and procedures for due process
 355 when action is taken to suspend or dismiss, not to
 356 promote, or not to renew the appointment of a fellow;
 357 (Core)
 358

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring

Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 359
360
361
362
363
364
365
366
367
368
369
370
371
372
373
374
- II.A.4.a).(13) ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; ^(Core)
- II.A.4.a).(13).(a) Fellows must not be required to sign a non-competition guarantee or restrictive covenant. ^(Core)
- II.A.4.a).(14) document verification of program completion for all graduating fellows within 30 days; ^(Core)
- II.A.4.a).(15) provide verification of an individual fellow's completion upon the fellow's request, within 30 days; and, ^(Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

398
399
400
401
- II.A.4.a).(16) obtain review and approval of the Sponsoring Institution's DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director's Guide to the Common Program Requirements. ^(Core)
- II.B. Faculty
- Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.*
- Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty*

402
403
404
405

members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

412
413
414
415
416
417

- II.B.1.** For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)
- II.B.2.** Faculty members must:
 - II.B.2.a)** be role models of professionalism; ^(Core)
 - II.B.2.b)** demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

430
431
432

- II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)
- II.B.2.d)** devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)
- II.B.2.e)** administer and maintain an educational environment conducive to educating fellows; ^(Core)
- II.B.2.f)** regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, ^(Core)
- II.B.2.g)** pursue faculty development designed to enhance their skills at least annually. ^(Core)

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

433
434
435

II.B.3. Faculty Qualifications

436 **II.B.3.a)** **Faculty members must have appropriate qualifications in**
437 **their field and hold appropriate institutional appointments.**
438 **(Core)**

439
440 **II.B.3.b)** **Subspecialty physician faculty members must:**

441
442 **II.B.3.b).(1)** **have current certification in the subspecialty by the**
443 **American Board of Physical Medicine and Rehabilitation,**
444 **or possess qualifications judged acceptable to the**
445 **Review Committee. (Core)**

446
447 [Note that while the Common Program Requirements
448 deem certification by a certifying board of the AOA
449 acceptable, there is no AOA board that offers certification
450 in this subspecialty]

451
452 **II.B.3.b).(1).(a)** Dual primary certifications through both the
453 American Board of Physical Medicine and
454 Rehabilitation or the American Osteopathic Board
455 of Physical Medicine and Rehabilitation and the
456 American Board of Pediatrics or the American
457 Osteopathic Board of Pediatrics are considered
458 acceptable qualifications. (Detail)

459
460 **II.B.3.c)** **Any non-physician faculty members who participate in**
461 **fellowship program education must be approved by the**
462 **program director. (Core)**

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

464
465 **II.B.3.d)** **Any other specialty physician faculty members must have**
466 **current certification in their specialty by the appropriate**
467 **American Board of Medical Specialties (ABMS) member**
468 **board or American Osteopathic Association (AOA) certifying**
469 **board, or possess qualifications judged acceptable to the**
470 **Review Committee. (Core)**

471
472 **II.B.4.** **Core Faculty**

473
474 **Core faculty members must have a significant role in the education**
475 **and supervision of fellows and must devote a significant portion of**
476 **their entire effort to fellow education and/or administration, and**
477 **must, as a component of their activities, teach, evaluate, and provide**
478 **formative feedback to fellows. (Core)**

479

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

480

481 **II.B.4.a) Core faculty members must be designated by the program**
482 **director. (Core)**

483

484 **II.B.4.b) Core faculty members must complete the annual ACGME**
485 **Faculty Survey. (Core)**

486

487 **II.B.4.c) To ensure the quality of the educational and scholarly activity of**
488 **the program, and to provide adequate supervision of fellows, there**
489 **must be at least two core faculty members, inclusive of the**
490 **program director, who are certified in pediatric rehabilitation**
491 **medicine by the ABPMR, or have qualifications acceptable to the**
492 **Review Committee. (Core)**

493

494 **II.C. Program Coordinator**

495

496 **II.C.1. There must be a program coordinator. (Core)**

497

498 **II.C.2. The program coordinator must be provided with support adequate**
499 **for administration of the program based upon its size and**
500 **configuration. (Core)**

501

Background and Intent: Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

502

503 **II.D. Other Program Personnel**

504

505 The program, in partnership with its Sponsoring Institution, must jointly
506 ensure the availability of necessary personnel for the effective
507 administration of the program. ^(Core)
508

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

509
510 **III. Fellow Appointments**

511
512 **III.A. Eligibility Criteria**

513
514 **III.A.1. Eligibility Requirements – Fellowship Programs**

515
516 All required clinical education for entry into ACGME-accredited
517 fellowship programs must be completed in an ACGME-accredited
518 residency program, an AOA-approved residency program, a
519 program with ACGME International (ACGME-I) Advanced Specialty
520 Accreditation, or a Royal College of Physicians and Surgeons of
521 Canada (RCPSC)-accredited or College of Family Physicians of
522 Canada (CFPC)-accredited residency program located in Canada.
523 ^(Core)
524

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

525
526 **III.A.1.a) Fellowship programs must receive verification of each**
527 **entering fellow’s level of competence in the required field,**
528 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
529 **Milestones evaluations from the core residency program. ^(Core)**

530
531 **III.A.1.b) Prerequisite postgraduate clinical education**

532
533 Prerequisite education for entry into a pediatric rehabilitation
534 medicine program must include the satisfactory completion of a To
535 be eligible for appointment at the PRM-1 level, fellows must have
536 completed a physical medicine and rehabilitation residency
537 program that satisfies the requirements in III.A.1. ^(Core)

538
539 **III.A.1.b).(1) The educational program for these fellows must be 24**
540 **months in length. ^(Core)**

541
542 **III.A.1.b).(2) To be eligible for appointment at the PRM-2 level, fellows**
543 **must have completed residency programs that satisfy the**
544 **requirements in III.A.1. in both physical medicine and**
545 **rehabilitation and pediatrics, or a combined physical**
546 **medicine and rehabilitation and pediatrics program**

547 approved by the American Board of Physical Medicine and
548 Rehabilitation and the American Board of Pediatrics. ^(Core)
549
550 III.A.1.b).(2).(a) The educational program for these fellows must be
551 12 months in length. ^(Core)
552
553 **III.A.1.c) Fellow Eligibility Exception**
554
555 **The Review Committee for Physical Medicine and Rehabilitation**
556 **will allow the following exception to the fellowship eligibility**
557 **requirements:**
558
559 **III.A.1.c).(1) An ACGME-accredited fellowship program may accept**
560 **an exceptionally qualified international graduate**
561 **applicant who does not satisfy the eligibility**
562 **requirements listed in III.A.1., but who does meet all of**
563 **the following additional qualifications and conditions:**
564 ^(Core)
565
566 **III.A.1.c).(1).(a) evaluation by the program director and**
567 **fellowship selection committee of the**
568 **applicant's suitability to enter the program,**
569 **based on prior training and review of the**
570 **summative evaluations of training in the core**
571 **specialty; and, ^(Core)**
572
573 **III.A.1.c).(1).(b) review and approval of the applicant's**
574 **exceptional qualifications by the GMC; and,**
575 ^(Core)
576
577 **III.A.1.c).(1).(c) verification of Educational Commission for**
578 **Foreign Medical Graduates (ECFMG)**
579 **certification. ^(Core)**
580
581 **III.A.1.c).(2) Applicants accepted through this exception must have**
582 **an evaluation of their performance by the Clinical**
583 **Competency Committee within 12 weeks of**
584 **matriculation. ^(Core)**
585

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSG or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

III.B. The program director must not appoint more fellows than approved by the Review Committee. ^(Core)

III.B.1. All complement increases must be approved by the Review Committee. ^(Core)

III.C. Fellow Transfers

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. ^(Core)

IV. Educational Program

The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

IV.A. The curriculum must contain the following educational components: ^(Core)

IV.A.1. a set of program aims consistent with the Sponsoring Institution's mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; ^(Core)

IV.A.1.a) The program's aims must be made available to program applicants, fellows, and faculty members. ^(Core)

IV.A.2. competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to autonomous practice in their subspecialty. These must be

632 distributed, reviewed, and available to fellows and faculty members;
633 (Core)

634
635 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
636 responsibility for patient management, and graded supervision in
637 their subspecialty; (Core)
638

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

639
640 **IV.A.4.** structured educational activities beyond direct patient care; and,
641 (Core)
642

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

643
644 **IV.A.5.** advancement of fellows' knowledge of ethical principles
645 foundational to medical professionalism. (Core)
646

647 **IV.B. ACGME Competencies**
648

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

649
650 **IV.B.1.** The program must integrate the following ACGME Competencies
651 into the curriculum: (Core)
652

653 **IV.B.1.a) Professionalism**

654
655 Fellows must demonstrate a commitment to professionalism
656 and an adherence to ethical principles. (Core)
657

658 **IV.B.1.b) Patient Care and Procedural Skills**
659

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New*

Health System for the 21st Century, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality.* Health Affairs. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

660		
661	IV.B.1.b).(1)	Fellows must be able to provide patient care that is
662		compassionate, appropriate, and effective for the
663		treatment of health problems and the promotion of
664		health. ^(Core)
665		
666	IV.B.1.b).(1).(a)	Fellows completing the PRM-1 year must
667		demonstrate competency in: ^(Core)
668		
669	IV.B.1.b).(1).(a).(i)	<u>completing an</u> initial patient evaluation,
670		including pertinent information relevant to
671		the patient's impairments, medical
672		conditions, functional limitations, cognition,
673		psychosocial issues, and educational, or

842		and specific outcomes measures; and, (Core)
843		
844	IV.B.1.c).(2).(c)	administration and principles of organizational
845		behaviors and leadership, quality assurance, cost
846		efficiency, and regulations pertaining to systems of
847		care, including external reviews, inpatient services,
848		outpatient services, home care, and school-based
849		programs. (Core)
850		
851	IV.B.1.d)	Practice-based Learning and Improvement
852		
853		Fellows must demonstrate the ability to investigate and
854		evaluate their care of patients, to appraise and assimilate

855 scientific evidence, and to continuously improve patient care
856 based on constant self-evaluation and lifelong learning. ^(Core)
857

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

858
859 **IV.B.1.e) Interpersonal and Communication Skills**
860
861 **Fellows must demonstrate interpersonal and communication**
862 **skills that result in the effective exchange of information and**
863 **collaboration with patients, their families, and health**
864 **professionals. ^(Core)**

865
866 **IV.B.1.f) Systems-based Practice**
867
868 **Fellows must demonstrate an awareness of and**
869 **responsiveness to the larger context and system of health**
870 **care, including the social determinants of health, as well as**
871 **the ability to call effectively on other resources to provide**
872 **optimal health care. ^(Core)**

873
874 **IV.C. Curriculum Organization and Fellow Experiences**

875
876 **IV.C.1. The curriculum must be structured to optimize fellow educational**
877 **experiences, the length of these experiences, and supervisory**
878 **continuity. ^(Core)**

879
880 **IV.C.1.a) Assignment of rotations must be structured to minimize the**
881 **frequency of rotational transitions, and rotations must be of**
882 **sufficient length to provide a quality educational experience,**
883 **defined by continuity of patient care, ongoing supervision,**
884 **longitudinal relationships with faculty members, and meaningful**
885 **assessment and feedback. ^(Core)**

886
887 **IV.C.1.b) Clinical experiences should be structured to facilitate learning in a**
888 **manner that allows fellows to function as part of an effective**
889 **interprofessional team that works together longitudinally with**
890 **shared goals of patient safety and quality improvement. ^(Core)**

891
892 **IV.C.2. The program must provide instruction and experience in pain**

1054 IV.C.9.f).(2).(f) collaborating within and beyond the institution. ^(Detail)
1055

1056 IV.D. Scholarship

1057
1058 ***Medicine is both an art and a science. The physician is a humanistic***
1059 ***scientist who cares for patients. This requires the ability to think critically,***
1060 ***evaluate the literature, appropriately assimilate new knowledge, and***
1061 ***practice lifelong learning. The program and faculty must create an***
1062 ***environment that fosters the acquisition of such skills through fellow***
1063 ***participation in scholarly activities as defined in the subspecialty-specific***
1064 ***Program Requirements. Scholarly activities may include discovery,***
1065 ***integration, application, and teaching.***
1066

1067 ***The ACGME recognizes the diversity of fellowships and anticipates that***
1068 ***programs prepare physicians for a variety of roles, including clinicians,***
1069 ***scientists, and educators. It is expected that the program's scholarship will***
1070 ***reflect its mission(s) and aims, and the needs of the community it serves.***
1071 ***For example, some programs may concentrate their scholarly activity on***
1072 ***quality improvement, population health, and/or teaching, while other***
1073 ***programs might choose to utilize more classic forms of biomedical***
1074 ***research as the focus for scholarship.***
1075

1076 IV.D.1. Program Responsibilities

1077
1078 IV.D.1.a) The program must demonstrate evidence of scholarly
1079 activities, consistent with its mission(s) and aims. ^(Core)
1080

1081 IV.D.1.b) The program in partnership with its Sponsoring Institution,
1082 must allocate adequate resources to facilitate fellow and
1083 faculty involvement in scholarly activities. ^(Core)
1084

1085 IV.D.2. Faculty Scholarly Activity

1086
1087 IV.D.2.a) Among their scholarly activity, programs must demonstrate
1088 accomplishments in at least three of the following domains:
1089 ^(Core)
1090

- 1091 • Research in basic science, education, translational
1092 science, patient care, or population health
- 1093 • Peer-reviewed grants
- 1094 • Quality improvement and/or patient safety initiatives
- 1095 • Systematic reviews, meta-analyses, review articles,
1096 chapters in medical textbooks, or case reports

- 1097 • Creation of curricula, evaluation tools, didactic
- 1098 educational activities, or electronic educational
- 1099 materials
- 1100 • Contribution to professional committees, educational
- 1101 organizations, or editorial boards
- 1102 • Innovations in education
- 1103

1104 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
 1105 **activity within and external to the program by the following**
 1106 **methods:**
 1107

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1108

1109 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
 1110 **workshops, quality improvement presentations,**
 1111 **podium presentations, grant leadership, non-peer-**
 1112 **reviewed print/electronic resources, articles or**
 1113 **publications, book chapters, textbooks, webinars,**
 1114 **service on professional committees, or serving as a**
 1115 **journal reviewer, journal editorial board member, or**
 1116 **editor; (Outcome)‡**

1117

1118 **IV.D.2.b).(2) peer-reviewed publication. (Outcome)**

1119

1120 **IV.D.3. Fellow Scholarly Activity**

1121

1122 **IV.D.3.a) The curriculum must advance fellows’ knowledge of the basic**
 1123 **principles of research, including how research is conducted,**
 1124 **evaluated, explained to patients, and applied to patient care. (Core)**

1125

1126 **IV.D.3.b) Fellows should participate in structured, supervised research**
 1127 **education. (Detail)**

1128

1129 **IV.D.3.c) Each fellow should demonstrate scholarship through at least one**
 1130 **scientific presentation, abstract, or publication. (Outcome)**

1131

1132 **V. Evaluation**

1133

1134 **V.A. Fellow Evaluation**

1135

1136 **V.A.1. Feedback and Evaluation**

1137

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1138
1139
1140
1141
1142

- V.A.1.a)** Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1143
1144
1145
1146
1147
1148
1149
1150
1151
1152
1153
1154

- V.A.1.b)** Evaluation must be documented at the completion of the assignment. ^(Core)

- V.A.1.b).(1)** For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

- V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

- 1155
1156 **V.A.1.c)** The program must provide an objective performance
1157 evaluation based on the Competencies and the subspecialty-
1158 specific Milestones, and must: ^(Core)
1159
- 1160 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
1161 patients, self, and other professional staff members);
1162 and, ^(Core)
1163
- 1164 **V.A.1.c).(2)** provide that information to the Clinical Competency
1165 Committee for its synthesis of progressive fellow
1166 performance and improvement toward unsupervised
1167 practice. ^(Core)
1168

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1169
1170 **V.A.1.d)** The program director or their designee, with input from the
1171 Clinical Competency Committee, must:
1172
- 1173 **V.A.1.d).(1)** meet with and review with each fellow their
1174 documented semi-annual evaluation of performance,
1175 including progress along the subspecialty-specific
1176 Milestones. ^(Core)
1177
- 1178 **V.A.1.d).(2)** assist fellows in developing individualized learning
1179 plans to capitalize on their strengths and identify areas
1180 for growth; and, ^(Core)
1181
- 1182 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
1183 institutional policies and procedures. ^(Core)
1184

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention,

documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1185
 1186 **V.A.1.e)** At least annually, there must be a summative evaluation of
 1187 each fellow that includes their readiness to progress to the
 1188 next year of the program, if applicable. ^(Core)
 1189
 1190 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
 1191 for review by the fellow. ^(Core)
 1192
 1193 **V.A.2.** Final Evaluation
 1194
 1195 **V.A.2.a)** The program director must provide a final evaluation for each
 1196 fellow upon completion of the program. ^(Core)
 1197
 1198 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
 1199 applicable the subspecialty-specific Case Logs, must
 1200 be used as tools to ensure fellows are able to engage
 1201 in autonomous practice upon completion of the
 1202 program. ^(Core)
 1203
 1204 **V.A.2.a).(2)** The final evaluation must:
 1205
 1206 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
 1207 maintained by the institution, and must be
 1208 accessible for review by the fellow in
 1209 accordance with institutional policy; ^(Core)
 1210
 1211 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
 1212 knowledge, skills, and behaviors necessary to
 1213 enter autonomous practice; ^(Core)
 1214
 1215 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
 1216 Competency Committee; and, ^(Core)
 1217
 1218 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
 1219 the program. ^(Core)
 1220
 1221 **V.A.3.** A Clinical Competency Committee must be appointed by the
 1222 program director. ^(Core)
 1223
 1224 **V.A.3.a)** At a minimum the Clinical Competency Committee must
 1225 include three members, at least one of whom is a core faculty
 1226 member. Members must be faculty members from the same
 1227 program or other programs, or other health professionals
 1228 who have extensive contact and experience with the
 1229 program's fellows. ^(Core)

- 1230
- 1231 **V.A.3.b) The Clinical Competency Committee must:**
- 1232
- 1233 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
- 1234 **(Core)**
- 1235
- 1236 **V.A.3.b).(2) determine each fellow’s progress on achievement of**
- 1237 **the subspecialty-specific Milestones; and, ^(Core)**
- 1238
- 1239 **V.A.3.b).(3) meet prior to the fellows’ semi-annual evaluations and**
- 1240 **advise the program director regarding each fellow’s**
- 1241 **progress. ^(Core)**
- 1242
- 1243 **V.B. Faculty Evaluation**
- 1244
- 1245 **V.B.1. The program must have a process to evaluate each faculty**
- 1246 **member’s performance as it relates to the educational program at**
- 1247 **least annually. ^(Core)**
- 1248

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1249
- 1250 **V.B.1.a) This evaluation must include a review of the faculty member’s**
- 1251 **clinical teaching abilities, engagement with the educational**
- 1252 **program, participation in faculty development related to their**
- 1253 **skills as an educator, clinical performance, professionalism,**
- 1254 **and scholarly activities. ^(Core)**
- 1255
- 1256 **V.B.1.b) This evaluation must include written, confidential evaluations**
- 1257 **by the fellows. ^(Core)**
- 1258
- 1259 **V.B.2. Faculty members must receive feedback on their evaluations at least**
- 1260 **annually. ^(Core)**
- 1261

1262 V.B.3. Results of the faculty educational evaluations should be
1263 incorporated into program-wide faculty development plans. (Core)
1264

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1265
1266 V.C. Program Evaluation and Improvement
1267

1268 V.C.1. The program director must appoint the Program Evaluation
1269 Committee to conduct and document the Annual Program
1270 Evaluation as part of the program’s continuous improvement
1271 process. (Core)
1272

1273 V.C.1.a) The Program Evaluation Committee must be composed of at
1274 least two program faculty members, at least one of whom is a
1275 core faculty member, and at least one fellow. (Core)
1276

1277 V.C.1.b) Program Evaluation Committee responsibilities must include:

1278
1279 V.C.1.b).(1) acting as an advisor to the program director, through
1280 program oversight; (Core)
1281

1282 V.C.1.b).(2) review of the program’s self-determined goals and
1283 progress toward meeting them; (Core)
1284

1285 V.C.1.b).(3) guiding ongoing program improvement, including
1286 development of new goals, based upon outcomes;
1287 and, (Core)
1288

1289 V.C.1.b).(4) review of the current operating environment to identify
1290 strengths, challenges, opportunities, and threats as
1291 related to the program’s mission and aims. (Core)
1292

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

1293
1294 V.C.1.c) The Program Evaluation Committee should consider the
1295 following elements in its assessment of the program:
1296

1297 V.C.1.c).(1) curriculum; (Core)
1298

1299 V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);
1300 (Core)

1301		
1302	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; ^(Core)
1303		
1304		
1305	V.C.1.c).(4)	quality and safety of patient care; ^(Core)
1306		
1307	V.C.1.c).(5)	aggregate fellow and faculty:
1308		
1309	V.C.1.c).(5).(a)	well-being; ^(Core)
1310		
1311	V.C.1.c).(5).(b)	recruitment and retention; ^(Core)
1312		
1313	V.C.1.c).(5).(c)	workforce diversity; ^(Core)
1314		
1315	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; ^(Core)
1316		
1317		
1318	V.C.1.c).(5).(e)	scholarly activity; ^(Core)
1319		
1320	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, ^(Core)
1321		
1322		
1323	V.C.1.c).(5).(g)	written evaluations of the program. ^(Core)
1324		
1325	V.C.1.c).(6)	aggregate fellow:
1326		
1327	V.C.1.c).(6).(a)	achievement of the Milestones; ^(Core)
1328		
1329	V.C.1.c).(6).(b)	in-training examinations (where applicable); ^(Core)
1330		
1331		
1332	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1333		
1334	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1335		
1336	V.C.1.c).(7)	aggregate faculty:
1337		
1338	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1339		
1340	V.C.1.c).(7).(b)	professional development ^(Core)
1341		
1342	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)
1343		
1344		
1345		
1346	V.C.1.e)	The annual review, including the action plan, must:
1347		
1348	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1349		
1350		
1351	V.C.1.e).(2)	be submitted to the DIO. ^(Core)

1352
1353 V.C.2. The program must participate in a Self-Study prior to its 10-Year
1354 Accreditation Site Visit. ^(Core)

1355
1356 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
1357 ^(Core)
1358

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1359
1360 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
1361 *who seek and achieve board certification. One measure of the*
1362 *effectiveness of the educational program is the ultimate pass rate.*

1363
1364 *The program director should encourage all eligible program*
1365 *graduates to take the certifying examination offered by the*
1366 *applicable American Board of Medical Specialties (ABMS) member*
1367 *board or American Osteopathic Association (AOA) certifying board.*
1368

1369 V.C.3.a) For subspecialties in which the ABMS member board and/or
1370 AOA certifying board offer(s) an annual written exam, in the
1371 preceding three years, the program's aggregate pass rate of
1372 those taking the examination for the first time must be higher
1373 than the bottom fifth percentile of programs in that
1374 subspecialty. ^(Outcome)
1375

1376 V.C.3.b) For subspecialties in which the ABMS member board and/or
1377 AOA certifying board offer(s) a biennial written exam, in the
1378 preceding six years, the program's aggregate pass rate of
1379 those taking the examination for the first time must be higher
1380 than the bottom fifth percentile of programs in that
1381 subspecialty. ^(Outcome)
1382

1383 V.C.3.c) For subspecialties in which the ABMS member board and/or
1384 AOA certifying board offer(s) an annual oral exam, in the
1385 preceding three years, the program's aggregate pass rate of
1386 those taking the examination for the first time must be higher
1387 than the bottom fifth percentile of programs in that
1388 subspecialty. ^(Outcome)
1389

1390 V.C.3.d) For subspecialties in which the ABMS member board and/or
1391 AOA certifying board offer(s) a biennial oral exam, in the

1392 preceding six years, the program's aggregate pass rate of
1393 those taking the examination for the first time must be higher
1394 than the bottom fifth percentile of programs in that
1395 subspecialty. *(Outcome)*

1396
1397 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1398 whose graduates over the time period specified in the
1399 requirement have achieved an 80 percent pass rate will have
1400 met this requirement, no matter the percentile rank of the
1401 program for pass rate in that subspecialty. *(Outcome)*
1402

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1403
1404 **V.C.3.f)** Programs must report, in ADS, board certification status
1405 annually for the cohort of board-eligible fellows that
1406 graduated seven years earlier. *(Core)*
1407

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1408
1409 **VI. The Learning and Working Environment**

1410
1411 *Fellowship education must occur in the context of a learning and working*
1412 *environment that emphasizes the following principles:*

- 1413
- 1414 • *Excellence in the safety and quality of care rendered to patients by fellows*
 - 1415 *today*
- 1416

- 1417 • *Excellence in the safety and quality of care rendered to patients by today's*
- 1418 *fellows in their future practice*
- 1419
- 1420 • *Excellence in professionalism through faculty modeling of:*
- 1421
- 1422 ○ *the effacement of self-interest in a humanistic environment that supports*
- 1423 *the professional development of physicians*
- 1424
- 1425 ○ *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- 1426
- 1427 • *Commitment to the well-being of the students, residents, fellows, faculty*
- 1428 *members, and all members of the health care team*
- 1429

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1430
1431 **VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

1432
1433 **VI.A.1. Patient Safety and Quality Improvement**

1434
1435 *All physicians share responsibility for promoting patient safety and*

1436 *enhancing quality of patient care. Graduate medical education must*

1437 *prepare fellows to provide the highest level of clinical care with*

1438 *continuous focus on the safety, individual needs, and humanity of*

1439 *their patients. It is the right of each patient to be cared for by fellows*

1440 *who are appropriately supervised; possess the requisite knowledge,*

1441 *skills, and abilities; understand the limits of their knowledge and*

1442 *experience; and seek assistance as required to provide optimal*

1443 *patient care.*

1444
1445 *Fellows must demonstrate the ability to analyze the care they*
1446 *provide, understand their roles within health care teams, and play an*
1447 *active role in system improvement processes. Graduating fellows*
1448 *will apply these skills to critique their future unsupervised practice*
1449 *and effect quality improvement measures.*

1450
1451 *It is necessary for fellows and faculty members to consistently work*
1452 *in a well-coordinated manner with other health care professionals to*
1453 *achieve organizational patient safety goals.*

1454
1455 **VI.A.1.a) Patient Safety**

1456
1457 **VI.A.1.a).(1) Culture of Safety**

1458
1459 *A culture of safety requires continuous identification*
1460 *of vulnerabilities and a willingness to transparently*
1461 *deal with them. An effective organization has formal*
1462 *mechanisms to assess the knowledge, skills, and*
1463 *attitudes of its personnel toward safety in order to*
1464 *identify areas for improvement.*

1465
1466 **VI.A.1.a).(1).(a)** The program, its faculty, residents, and fellows
1467 must actively participate in patient safety
1468 systems and contribute to a culture of safety.
1469 (Core)

1470
1471 **VI.A.1.a).(1).(b)** The program must have a structure that
1472 promotes safe, interprofessional, team-based
1473 care. (Core)

1474
1475 **VI.A.1.a).(2) Education on Patient Safety**

1476
1477 Programs must provide formal educational activities
1478 that promote patient safety-related goals, tools, and
1479 techniques. (Core)

1480
Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1481
1482 **VI.A.1.a).(3) Patient Safety Events**

1483
1484 *Reporting, investigation, and follow-up of adverse*
1485 *events, near misses, and unsafe conditions are pivotal*
1486 *mechanisms for improving patient safety, and are*
1487 *essential for the success of any patient safety*
1488 *program. Feedback and experiential learning are*
1489 *essential to developing true competence in the ability*
1490 *to identify causes and institute sustainable systems-*
1491 *based changes to ameliorate patient safety*
1492 *vulnerabilities.*

1493		
1494	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1495		
1496		
1497	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site;
1498		(Core)
1499		
1500		
1501	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and,
1502		(Core)
1503		
1504		
1505	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution’s patient safety reports.
1506		(Core)
1507		
1508		
1509	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.
1510		(Core)
1511		
1512		
1513		
1514		
1515		
1516	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1517		
1518		
1519		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1520		
1521		
1522		
1523		
1524		
1525	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families.
1526		(Core)
1527		
1528		
1529	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated.
1530		(Detail)†
1531		
1532		
1533	VI.A.1.b)	Quality Improvement
1534		
1535	VI.A.1.b).(1)	Education in Quality Improvement
1536		
1537		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1538		
1539		
1540		
1541		

1542 VI.A.1.b).(1).(a) Fellows must receive training and experience in
1543 quality improvement processes, including an
1544 understanding of health care disparities. ^(Core)
1545

1546 VI.A.1.b).(2) Quality Metrics

1547
1548 *Access to data is essential to prioritizing activities for*
1549 *care improvement and evaluating success of*
1550 *improvement efforts.*

1551
1552 VI.A.1.b).(2).(a) Fellows and faculty members must receive data
1553 on quality metrics and benchmarks related to
1554 their patient populations. ^(Core)
1555

1556 VI.A.1.b).(3) Engagement in Quality Improvement Activities

1557
1558 *Experiential learning is essential to developing the*
1559 *ability to identify and institute sustainable systems-*
1560 *based changes to improve patient care.*

1561
1562 VI.A.1.b).(3).(a) Fellows must have the opportunity to
1563 participate in interprofessional quality
1564 improvement activities. ^(Core)
1565

1566 VI.A.1.b).(3).(a).(i) This should include activities aimed at
1567 reducing health care disparities. ^(Detail)
1568

1569 VI.A.2. Supervision and Accountability

1570
1571 VI.A.2.a) *Although the attending physician is ultimately responsible for*
1572 *the care of the patient, every physician shares in the*
1573 *responsibility and accountability for their efforts in the*
1574 *provision of care. Effective programs, in partnership with*
1575 *their Sponsoring Institutions, define, widely communicate,*
1576 *and monitor a structured chain of responsibility and*
1577 *accountability as it relates to the supervision of all patient*
1578 *care.*

1579
1580 *Supervision in the setting of graduate medical education*
1581 *provides safe and effective care to patients; ensures each*
1582 *fellow's development of the skills, knowledge, and attitudes*
1583 *required to enter the unsupervised practice of medicine; and*
1584 *establishes a foundation for continued professional growth.*
1585

1586 VI.A.2.a).(1) Each patient must have an identifiable and
1587 appropriately-credentialed and privileged attending
1588 physician (or licensed independent practitioner as
1589 specified by the applicable Review Committee) who is
1590 responsible and accountable for the patient's care.
1591 ^(Core)
1592

1593	VI.A.2.a).(1).(a)	This information must be available to fellows, faculty members, other members of the health care team, and patients. ^(Core)
1594		
1595		
1596		
1597	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)
1598		
1599		
1600		
1601	VI.A.2.b)	<i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the immediate availability of the supervising faculty member or fellow, either on site or by means of telephonic and/or electronic modalities. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.</i>
1602		
1603		
1604		
1605		
1606		
1607		
1608		
1609		
1610		
1611		
1612	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
1613		
1614		
1615		
1616		
1617		
1618		
1619	VI.A.2.c)	Levels of Supervision
1620		
1621		To promote oversight of fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
1622		
1623		
1624		
1625	VI.A.2.c).(1)	Direct Supervision – the supervising physician is physically present with the fellow and patient. ^(Core)
1626		
1627		
1628	VI.A.2.c).(2)	Indirect Supervision:
1629		
1630	VI.A.2.c).(2).(a)	with Direct Supervision immediately available – the supervising physician is physically within the hospital or other site of patient care, and is immediately available to provide Direct Supervision. ^(Core)
1631		
1632		
1633		
1634		
1635		
1636	VI.A.2.c).(2).(b)	with Direct Supervision available – the supervising physician is not physically present within the hospital or other site of patient care, but is immediately available by means of telephonic and/or electronic modalities, and is available to provide Direct Supervision. ^(Core)
1637		
1638		
1639		
1640		
1641		
1642		

- 1643 VI.A.2.c).(3) Oversight – the supervising physician is available to
- 1644 provide review of procedures/encounters with
- 1645 feedback provided after care is delivered. (Core)
- 1646
- 1647 VI.A.2.d) The privilege of progressive authority and responsibility,
- 1648 conditional independence, and a supervisory role in patient
- 1649 care delegated to each fellow must be assigned by the
- 1650 program director and faculty members. (Core)
- 1651
- 1652 VI.A.2.d).(1) The program director must evaluate each fellow’s
- 1653 abilities based on specific criteria, guided by the
- 1654 Milestones. (Core)
- 1655
- 1656 VI.A.2.d).(2) Faculty members functioning as supervising
- 1657 physicians must delegate portions of care to fellows
- 1658 based on the needs of the patient and the skills of
- 1659 each fellow. (Core)
- 1660
- 1661 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
- 1662 fellows and residents in recognition of their progress
- 1663 toward independence, based on the needs of each
- 1664 patient and the skills of the individual resident or
- 1665 fellow. (Detail)
- 1666
- 1667 VI.A.2.e) Programs must set guidelines for circumstances and events
- 1668 in which fellows must communicate with the supervising
- 1669 faculty member(s). (Core)
- 1670
- 1671 VI.A.2.e).(1) Each fellow must know the limits of their scope of
- 1672 authority, and the circumstances under which the
- 1673 fellow is permitted to act with conditional
- 1674 independence. (Outcome)
- 1675

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1676
- 1677 VI.A.2.f) Faculty supervision assignments must be of sufficient
- 1678 duration to assess the knowledge and skills of each fellow
- 1679 and to delegate to the fellow the appropriate level of patient
- 1680 care authority and responsibility. (Core)
- 1681
- 1682 VI.B. Professionalism
- 1683
- 1684 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
- 1685 educate fellows and faculty members concerning the professional
- 1686 responsibilities of physicians, including their obligation to be
- 1687 appropriately rested and fit to provide the care required by their
- 1688 patients. (Core)
- 1689
- 1690 VI.B.2. The learning objectives of the program must:

- 1691
1692 VI.B.2.a) be accomplished through an appropriate blend of supervised
1693 patient care responsibilities, clinical teaching, and didactic
1694 educational events; ^(Core)
1695
1696 VI.B.2.b) be accomplished without excessive reliance on fellows to
1697 fulfill non-physician obligations; and, ^(Core)
1698

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

- 1699
1700 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)
1701

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

- 1702
1703 VI.B.3. The program director, in partnership with the Sponsoring Institution,
1704 must provide a culture of professionalism that supports patient
1705 safety and personal responsibility. ^(Core)
1706
1707 VI.B.4. Fellows and faculty members must demonstrate an understanding
1708 of their personal role in the:
1709
1710 VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)
1711
1712 VI.B.4.b) safety and welfare of patients entrusted to their care,
1713 including the ability to report unsafe conditions and adverse
1714 events; ^(Outcome)
1715

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

- 1716
1717 VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)
1718

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for

patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1719
1720 VI.B.4.c).(1) management of their time before, during, and after
1721 clinical assignments; and, (Outcome)
1722
- 1723 VI.B.4.c).(2) recognition of impairment, including from illness,
1724 fatigue, and substance use, in themselves, their peers,
1725 and other members of the health care team. (Outcome)
1726
- 1727 VI.B.4.d) commitment to lifelong learning; (Outcome)
1728
- 1729 VI.B.4.e) monitoring of their patient care performance improvement
1730 indicators; and, (Outcome)
1731
- 1732 VI.B.4.f) accurate reporting of clinical and educational work hours,
1733 patient outcomes, and clinical experience data. (Outcome)
1734
- 1735 VI.B.5. All fellows and faculty members must demonstrate responsiveness
1736 to patient needs that supersedes self-interest. This includes the
1737 recognition that under certain circumstances, the best interests of
1738 the patient may be served by transitioning that patient's care to
1739 another qualified and rested provider. (Outcome)
1740
- 1741 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1742 provide a professional, equitable, respectful, and civil environment
1743 that is free from discrimination, sexual and other forms of
1744 harassment, mistreatment, abuse, or coercion of students, fellows,
1745 faculty, and staff. (Core)
1746
- 1747 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1748 have a process for education of fellows and faculty regarding
1749 unprofessional behavior and a confidential process for reporting,
1750 investigating, and addressing such concerns. (Core)
1751
- 1752 VI.C. Well-Being
1753
- 1754 *Psychological, emotional, and physical well-being are critical in the*
1755 *development of the competent, caring, and resilient physician and require*
1756 *proactive attention to life inside and outside of medicine. Well-being*
1757 *requires that physicians retain the joy in medicine while managing their*

1772
1773

competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians’ ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME’s ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1.e).(1)

encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, substance abuse, suicidal ideation, or potential for violence; (Core)

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired

physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1821
1822 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1823 and, ^(Core)
1824
1825 VI.C.1.e).(3) provide access to confidential, affordable mental
1826 health assessment, counseling, and treatment,
1827 including access to urgent and emergent care 24
1828 hours a day, seven days a week. ^(Core)
1829

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1830
1831 VI.C.2. There are circumstances in which fellows may be unable to attend
1832 work, including but not limited to fatigue, illness, family
1833 emergencies, and parental leave. Each program must allow an
1834 appropriate length of absence for fellows unable to perform their
1835 patient care responsibilities. ^(Core)
1836
1837 VI.C.2.a) The program must have policies and procedures in place to
1838 ensure coverage of patient care. ^(Core)
1839
1840 VI.C.2.b) These policies must be implemented without fear of negative
1841 consequences for the fellow who is or was unable to provide
1842 the clinical work. ^(Core)
1843

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1844
1845 VI.D. Fatigue Mitigation
1846
1847 VI.D.1. Programs must:
1848
1849 VI.D.1.a) educate all faculty members and fellows to recognize the
1850 signs of fatigue and sleep deprivation; ^(Core)
1851
1852 VI.D.1.b) educate all faculty members and fellows in alertness
1853 management and fatigue mitigation processes; and, ^(Core)
1854

1855 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1856 manage the potential negative effects of fatigue on patient
1857 care and learning. ^(Detail)
1858

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1859
1860 VI.D.2. Each program must ensure continuity of patient care, consistent
1861 with the program’s policies and procedures referenced in VI.C.2–
1862 VI.C.2.b), in the event that a fellow may be unable to perform their
1863 patient care responsibilities due to excessive fatigue. ^(Core)
1864

1865 VI.D.3. The program, in partnership with its Sponsoring Institution, must
1866 ensure adequate sleep facilities and safe transportation options for
1867 fellows who may be too fatigued to safely return home. ^(Core)
1868

1869 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care
1870

1871 VI.E.1. Clinical Responsibilities
1872

1873 The clinical responsibilities for each fellow must be based on PGY
1874 level, patient safety, fellow ability, severity and complexity of patient
1875 illness/condition, and available support services. ^(Core)
1876

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1877
1878 VI.E.2. Teamwork
1879

1880 Fellows must care for patients in an environment that maximizes
1881 communication. This must include the opportunity to work as a

1882 member of effective interprofessional teams that are appropriate to
1883 the delivery of care in the subspecialty and larger health system.
1884 (Core)

1885
1886 **VI.E.3. Transitions of Care**

1887
1888 **VI.E.3.a) Programs must design clinical assignments to optimize**
1889 **transitions in patient care, including their safety, frequency,**
1890 **and structure. (Core)**

1891
1892 **VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,**
1893 **must ensure and monitor effective, structured hand-over**
1894 **processes to facilitate both continuity of care and patient**
1895 **safety. (Core)**

1896
1897 **VI.E.3.c) Programs must ensure that fellows are competent in**
1898 **communicating with team members in the hand-over process.**
1899 **(Outcome)**

1900
1901 **VI.E.3.d) Programs and clinical sites must maintain and communicate**
1902 **schedules of attending physicians and fellows currently**
1903 **responsible for care. (Core)**

1904
1905 **VI.E.3.e) Each program must ensure continuity of patient care,**
1906 **consistent with the program’s policies and procedures**
1907 **referenced in VI.C.2-VI.C.2.b), in the event that a fellow may**
1908 **be unable to perform their patient care responsibilities due to**
1909 **excessive fatigue or illness, or family emergency. (Core)**

1910
1911 **VI.F. Clinical Experience and Education**

1912
1913 *Programs, in partnership with their Sponsoring Institutions, must design*
1914 *an effective program structure that is configured to provide fellows with*
1915 *educational and clinical experience opportunities, as well as reasonable*
1916 *opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1917
1918
1919 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**

1920
1921 **Clinical and educational work hours must be limited to no more than**
1922 **80 hours per week, averaged over a four-week period, inclusive of all**
1923 **in-house clinical and educational activities, clinical work done from**
1924 **home, and all moonlighting. (Core)**
1925

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the

accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1944
1945
1946
1947

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1948
1949
1950
1951
1952

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

1953

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1954

VI.F.3. Maximum Clinical Work and Education Period Length

1955

1956

1957

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

1958

1959

1960

1961

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)

1962

1963

1964

1965

1966

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

1967

1968

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1969

VI.F.4. Clinical and Educational Work Hour Exceptions

1970

1971

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

1972

1973

1974

1975

1976

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)

1977

1978

1979

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)

1980

1981

1982

- 1983 VI.F.4.a).(3) to attend unique educational events. (Detail)
- 1984
- 1985 VI.F.4.b) These additional hours of care or education will be counted
- 1986 toward the 80-hour weekly limit. (Detail)
- 1987

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1988
- 1989 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
- 1990 for up to 10 percent or a maximum of 88 clinical and
- 1991 educational work hours to individual programs based on a
- 1992 sound educational rationale.
- 1993
- 1994 The Review Committee for Physical Medicine and Rehabilitation
- 1995 will not consider requests for exceptions to the 80-hour limit to the
- 1996 fellows' work week.
- 1997

- 1998 VI.F.4.c).(1) In preparing a request for an exception, the program
- 1999 director must follow the clinical and educational work
- 2000 hour exception policy from the *ACGME Manual of*
- 2001 *Policies and Procedures.* (Core)
- 2002

- 2003 VI.F.4.c).(2) Prior to submitting the request to the Review
- 2004 Committee, the program director must obtain approval
- 2005 from the Sponsoring Institution's GMEC and DIO. (Core)
- 2006

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

- 2007
- 2008 VI.F.5. Moonlighting
- 2009
- 2010 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
- 2011 to achieve the goals and objectives of the educational
- 2012 program, and must not interfere with the fellow's fitness for
- 2013 work nor compromise patient safety. (Core)
- 2014

2015 VI.F.5.b) Time spent by fellows in internal and external moonlighting
2016 (as defined in the ACGME Glossary of Terms) must be
2017 counted toward the 80-hour maximum weekly limit. ^(Core)
2018

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2019 VI.F.6. In-House Night Float
2020
2021
2022 Night float must occur within the context of the 80-hour and one-
2023 day-off-in-seven requirements. ^(Core)
2024

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2025 VI.F.7. Maximum In-House On-Call Frequency
2026
2027
2028 Fellows must be scheduled for in-house call no more frequently than
2029 every third night (when averaged over a four-week period). ^(Core)
2030

2031 VI.F.8. At-Home Call
2032

2033 VI.F.8.a) Time spent on patient care activities by fellows on at-home
2034 call must count toward the 80-hour maximum weekly limit.
2035 The frequency of at-home call is not subject to the every-
2036 third-night limitation, but must satisfy the requirement for one
2037 day in seven free of clinical work and education, when
2038 averaged over four weeks. ^(Core)
2039

2040 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
2041 preclude rest or reasonable personal time for each
2042 fellow. ^(Core)
2043

2044 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
2045 home call to provide direct care for new or established
2046 patients. These hours of inpatient patient care must be
2047 included in the 80-hour maximum weekly limit. ^(Detail)
2048

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

***Core Requirements:** Statements that define structure, resource, or process elements essential to every graduate medical educational program.

†Detail Requirements: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

‡Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Recognition

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply (www.acgme.org/OsteopathicRecognition).
